Ahmedabad

TO WHOM SO EVER IT MAY CONCERN

This is to certify that we have purchased and installed the Kashyap – anti scale system in our Cooling System, **Rolex Rings Pvt. Ltd, at Rajkot** and working perfectly and our full satisfaction ever since the installation. We had purchased the same from **M/s. Excellent Water Technology, Ahmedabad.**

We have installed **K – 50 Model** of “Kashyap” in our **PHE** in August, 2015. We are glad to install Kashyap water treatment product which is compatible with environment and which renders the optimum output at very low running cost.

Earlier we used to use RO water and chemicals to control scale and rust formation in the cooling tower. It was very expensive and time consuming as we have to regularly check the water parameters and dose the chemical on a day to day basis. Also to maintain the hardness level we use to do frequent blow down which do lots of water wastage.

After installing Kashyap on our cooling tower we have stop using the RO water and chemicals. We feed the raw water to the cooling towers and the temperature of the PHE and the condenser is maintained and there is no scale build up. Also the small amount of scale which is visible can be easily cleaned with the brush on the cooling tower.

We are very happy with these results and the effectiveness of the product. This product for the cooling tower is truly a chemical free solution.

USE IT TO SEE THE DIFFERENCE.
